WORK EXPERIENCE

VAKEN TECHNOLOGIES PVT, LTD. — Oct 2020 - Present
Software engineer - Team Leader

I've started this iOS Engine project in **IVTL Infoview Technologies Pvt, Ltd** company from **Aug 2020** and after that the company has mutually splitted. Being a team lead and managing the team of 10 members, whom involved in API development of iOS Mobile device management (MDM) Engine application using Java and MySQL.

In this iOS Engine application, We are creating the API which used to control the iOS devices based on the Apple MDM documentation and the customer's requirements.

Analyze the requirements clearly and transfer the knowledge to the team members. Effectively assign tasks to team members to optimize productivity. Monitoring the progress of project reports and maintain the Redmine tasks clearly.

Sharing the weekly reports with the customers in weekly meeting and clarifying the doubts. Motivating the team members and helping their carrier growth.

IVTL Infoview Technologies Pvt, Ltd. — Mar 2020 - Jul 2020
Software engineer

Worked as Android App developer based on Mobile device management (MDM) application that incorporates the functions necessary for device control using Java and XML.

Analyzed the client's requirements based on this created the design document.

Developed the Launcher application, It fetched the API result from the MDM server and apply the results in the mobile device.

I've completed this project alone and delivered the project on schedule.

IVTL Infoview Technologies Pvt, Ltd. **Sep 2019 - Feb 2020**
Junior software engineer

Worked as a full stack developer in web Application based on Android Mobile device management (MDM) application using React JS as front end and Java as Back end server with MySQL DB.

In this Android MDM application, We are creating the MDM web server which used to control the android devices based on the Google Android Management API documentation and the customer's requirements.

Explaining the client's requirements to team members and solve their doubts with clear explanation and delivered the project on schedule.

IVTL Infoview Technologies Pvt, Ltd. **Apr 2017 - Sep 2019**
Junior software engineer

Worked as a web Application developer based on ERP products with AI features that incorporates the functions necessary for Accounts and Supply Chain Management.

Communicate with business analysts and clients, to analysis their catalogs specifications to implemented ERP Accounts products.

Explaining the client's requirements to team members and solve their doubts with clear explanation and delivered the project on schedule.

IVTL Infoview Technologies Pvt, Ltd. **Jul 2015 - Mar 2017**
Trainee engineer

Worked as a web application developer in a conversion product where the desktop application based on Delphi is converted to a web application that incorporates the functions necessary for Human Resource Management

Analyze the design documents and products functionality to developed the payroll ERP products. To coordinated each member to consolidate the complex modules and deliver the more quality product.
