GUNASEELAN N

Lead Software Engineer | Agentic AI, Enterprise No-Code Platform & Full-Stack Architect

Mobile: +91 89038 57336
Email: nguna.mdi@gmail.com
Web: gunaangs.github.io
Google Play: pub: Angs Corp

EXECUTIVE SUMMARY

High-impact Lead Software Engineer with 11+ years of end-to-end engineering excellence architecting enterprise platforms, Agentic AI systems, enterprise No-Code application suites, and Mobile Device Management (MDM) engines. Technical core contributor to the **Sovablu No-Code Platform** (driving **GalaxyONE** multi-agent prompt engines, custom AI agentic tool creation, and **AI xChange** intelligent document processing with OCR-to-GenAI migration). Proven engineering leader directing cross-functional squads (10+ developers), delivering resilient microservices, and modernizing global enterprise systems. Solo creator and publisher of multiple high-grade mobile applications with 100% crash-free architecture and strict adherence to modern design standards (Material 3).

CORE COMPETENCIES & TECHNICAL STACK

Agentic AI & GenAI:	Agentic AI Workflows, GalaxyONE Multi-Agent Engine, Prompt Engineering & Orchestration, Custom AI Agentic Tools, AI xChange, OCR to GenAI Migration, LLM API Integration
Enterprise No-Code:	Sovablu Enterprise Platform Core, Job Schedulers, File Upload & Processing Components, Sovablu Drive Architecture, Framework Configuration Engines
Backend & APIs:	Java (Core & Advanced), Spring Boot, Microservices, RESTful API Design, Apple MDM Protocol, Android Management API, Kiosk & Lockdown Engines
Frontend & Mobile:	React.js, React Native, Android SDK (Java/XML), TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Material 3
Data & DevOps:	MySQL, SQLite, Room DB, Firebase, Query Optimization, Git, Maven, Gradle, Jenkins, Docker, CI/CD Automation, JUnit Test Suites
Leadership & Delivery:	System Architecture, Technical Mentorship (10+ developers), Agile/Scrum Sprint Planning, Code Reviews, Client Stakeholder Alignment

PROFESSIONAL EXPERIENCE

Software Engineer — Team Leader (No-Code Core & Agentic AI) | Vaken Technologies Pvt. Ltd.

May 2022 – Present

Sovablu Enterprise No-Code Platform & GalaxyONE Multi-Agent AI Engine

- **GalaxyONE Agentic AI & Prompt Handling:** Core engineer in the **GalaxyONE** multi-agent architecture; engineered prompt-handling pipelines and designed custom **AI agentic tools** enabling specialized copilots to translate natural language specifications directly into functional enterprise application models.
- **AI xChange & OCR-to-GenAI Migration:** Spearheaded the evolution of **AI xChange** intelligent document processing component, migrating legacy OCR extraction workflows into advanced AI-enabled APIs and LLMs, drastically improving structured data extraction accuracy across complex documents and invoices.
- **Sovablu Drive & File Framework Screens:** Architected **Sovablu Drive**, the platform's central document and asset management system, alongside enterprise file upload components, chunked processing, validation pipelines, and dynamic configuration framework screens.
- **Enterprise Job Scheduler Engine:** Designed and implemented high-reliability enterprise Job Scheduler screens and backend execution frameworks to automate complex recurring workflows and background jobs across client applications.

Software Engineer — Team Leader (iOS MDM Engine) | Vaken Technologies Pvt. Ltd.

Oct 2020 – May 2022

iOS Mobile Device Management (MDM) Engine & Concurrency Backend Architecture

- **Architecture & Protocol Delivery:** Architected and delivered high-throughput REST APIs for the enterprise iOS MDM Engine using Java and MySQL, strictly implementing Apple MDM Protocol specifications for device enrollment, remote command execution, and configuration profiles.
- **Engineering Leadership:** Directed and mentored a squad of 10 backend engineers, driving sprint planning, requirement breakdowns, high/low-level design documentation, and peer code reviews with 99%+ sprint milestone adherence.
- **Performance Optimization:** Refactored mission-critical database schemas and tuned indexing on core device status tables, reducing API response latency and supporting seamless multi-tenant operations.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Engineer (Android MDM & Full-Stack Portal) | Works Applications (India) Pvt. Ltd. (formerly IVTL Infoview) — Sep 2019 – Jul 2020

Custom Android MDM Kiosk Launcher & Web Administrative Console

- **Autonomous Kiosk Launcher Execution:** Independently designed, built, and delivered an Android MDM Custom Launcher application within strict timelines, consuming MDM policy endpoints to enforce granular hardware restrictions and kiosk lock-down.
- **Full-Stack Administrative Portal:** Engineered a full-stack portal using React.js and Java backend to remotely configure, monitor, and enforce Google Android Management API policies across enterprise device fleets.

Junior Software Engineer (ERP Solutions) | Works Applications (India) Pvt. Ltd. (formerly IVTL Infoview) — Apr 2017 – Sep 2019

Enterprise ERP Suites with AI & Automated Accounting Features for Japanese Market

- **Enterprise Feature Engineering:** Developed core transactional accounting and supply chain modules with automated validation rules and business intelligence dashboards for top-tier Japanese enterprises.
- **Team Enablement & Mentorship:** Guided junior developers on design patterns and module consolidation, standardizing code quality across cross-functional product squads.

Trainee Engineer (Legacy Modernization) | Works Applications (India) Pvt. Ltd. (formerly IVTL Infoview) — Jul 2015 – Mar 2017

Desktop Delphi to High-Availability Cloud Web Platform Migration

- **Legacy Modernization:** Re-engineered legacy desktop Delphi HR & Payroll software into modern Java web applications, implementing high-precision payroll compliance calculation engines.

PUBLISHED MOBILE APPLICATIONS & INDEPENDENT PRODUCTS (ANGS CORP)

Secure Notes [React Native | Security]

Production-grade offline notes app with AES-256 local encryption, biometric lock, dynamic Material 3 theming, and zero network transmission.

Google Play: com.angs.securenotes

MoneyWise [React Native | FinTech]

Comprehensive personal finance tracker with multi-account ledgers, interactive budget analytics, multi-currency support, and offline-first SQLite sync.

Google Play: com.angs.moneywise

AppShield [React Native | Privacy]

Privacy & permission auditor inspecting third-party apps, background sensor/network access, and system security posture in real time.

Google Play: com.angs.appshield

PixelSqueeze [React Native | Media Utility]

High-speed on-device image compression and format converter leveraging native bridge modules for hardware-accelerated processing.

Google Play: com.angs.pixelsqueeze

EDUCATION & ACADEMIC DISTINCTION

Bachelor of Technology (B.Tech) — Information Technology — **CGPA: 8.96 / 10** | 2011 – 2015

Adhiyamaan College of Engineering, Hosur (Anna University)

- **State Level Winner: 'Student Innovator Award 2015' (ICTACT Tamil Nadu)**
  Published research & system: *'Uzhavan Puthagam: Web Based System of Effective Farm Collaboration'* (ACCCAS-2015 Conference) in Computer Science & IT Applications.
